

EGGHEAD

GAME 7

MATH SKILL

Basic addition facts for sums through 12

NUMBER OF PLAYERS

2

MATERIALS

2 hexahedra dice

Game sheet 7

1 small marker per player

HOW TO PLAY

The object of the game is to move your markers from egg to egg by finding sums.

Put your markers on *START*.

Roll the dice to see who begins. Whoever rolls the greater sum starts.

Roll the dice. If the sum of the 2 numbers you roll is in the first egg, move your marker to that egg; otherwise, stay on *START*. Take turns rolling the dice. After each roll, try to move your marker to the next egg by finding the sum of the numbers you roll. You may only move your marker if the sum of the numbers you roll is in the next egg.

Continue the game until a player lands on the *EGGHEAD*.

The first player to land on the *EGGHEAD* is the winner.

VARIATIONS

Change the sums in the eggs and have the players use other polyhedra dice.
