

Speech Sound Production - /p/

| St Anthony's Primary School | Week Two |

Making the Sound

- /p/ sound is called the “Pop” or “Popcorn” sound
- **How:** to make the /p/ sound, we need to place our lips together, pop the air and make a short sound.
- If you have a hand-held mirror at home, allow your child to use it to see and compare themselves to your modelling of the sound.
- **Tactile Cue:** when the /p/ sound is produced put the child's hand in front of their lips as they make the sound to feel the air, ask them *“make a pop sound, can you feel the air?”*
- **When:** The /p/ sound is often one of the very first sounds a child will learn. Most children will typically be able to create this sound effectively within the first *two to three years*.
